

13 March 2007

Earthport joins SETSmm

As of 13 March 2007 Earthport (epo) is trading on the London Stock Exchange SETSmm platform, which allows firm buyers and sellers to place orders through an order book alongside existing market maker provision.

The automatic order-driven trading service is flexible and transparent, ensuring that every buy or sell order receives maximum exposure, resulting in a seamless and cost-effective execution. Order book trades in UK and Irish Securities are covered by a central counterparty operated by the London Clearing House.
